SUMMARY

Software Engineer and Game Developer with professional experience in Unity and C#, alongside hands-on development in .NET and backend systems. Experienced with object-oriented design, SOLID principles, reflection, custom attributes, REST APIs, unit testing and code quality. Built and published 25+ mobile games and contributed to award-winning Teknofest satellite and rocket projects involving telemetry, ground-station software and system integration.

EXPERIENCE

Independent Game Developer Self Employed	Dec 2024 – Aug 2026
Sooplay Game Developer	Nov 2024 – Dec 2024
Ankara Bilim Üniversitesi Guest Lecturer	Oct 2023 – Jan 2024
OTTO Games Game Developer	Jan 2022 – Feb 2024
Bera Ar-Ge Yazılım Intern	Jun 2018 – Jul 2018

EDUCATION

Firat University B.Sc. in Computer Engineering	Sept 2015 – Mar 2020
Bialystok University of Technology B.Sc. in Faculty of Computer Science (Erasmus+)	Sept 2018 – Feb 2019
Firat University English Preparatory Program	Sept 2014 – Jun 2015

TECHNICAL SKILLS

Languages: C#, Java, SQL
Backend: .NET, ASP.NET Core, REST APIs
Software Engineering: OOP, SOLID, Design Patterns, Reflection, Generics, LINQ, Custom Attributes
Testing & Quality: NUnit, Moq, Unit Testing, Code Coverage, StyleCop, SonarQube
Game Development: Unity 3D, C#, PlayFab, Firebase
Databases & Tools: MSSQL, SQLite, Git, SourceTree, Trello, Android Studio
Languages: Turkish (Native), English (Intermediate)

SELECTED PROJECTS

Attribute Validation Service — Generic C# validation service using custom validation attributes, validation results and automated tests.
Create Table of Records - Reflection — Generic .NET 8 implementation using reflection to inspect public properties at runtime and render collections as formatted tables.
Mock Testing - Transaction Processor — NUnit/Moq test suite covering dependency mocking, permission checks, balance validation, exception handling and interaction verification.
Additional C#/.NET work: HSL Color Struct, Contiguous Substrings, VideoGameCharacterApi.
Previous projects: Valorant App, PazarYeri, RentCar, Bulky MVC, GameStore API; desktop business-process automation with C# and MSSQL; 25+ published mobile game projects.

ACHIEVEMENTS

Teknofest Türksat Model Satellite Competition - 3rd Place (UVCSAT Team) — Ground-station software, telemetry monitoring and software integration.
Ternofest Rocket Competition - 3rd Place — Telemetry processing and ground-station software.
